Features:

- A genuine universal table which is flexible, sturdy, mobile and extremely easy to adjust.
- Table top is divided into 4 sections providing numerous positions.
- Detachable head section and detachable leg section provide versatility.
- Table top frame is made of durable epoxy coated steel; base cover and column telescopic covers and accessories rails are made of stainless steel.
- Up & down positioning is activated by foot pedal operated hydraulic pump.
- Trendelenburg, back section, head section, and leg section positioning are controlled by lockable gas springs which also provide weight compensation, and quick, easy adjustment.
- Lateral tilt positions are obtained by crank situated on side of the frame.
- Table top is x-ray translucent with slots for x-ray film cassette insertion, making radiography possible over the entire length of the table.
- Special antistatic and antibacterial material is used for mattress covers.
- Mattresses are easily removable and totally sealed to facilitate disinfection.
- Four easy-glide castors, two of which are swiveling, provide mobility.
- Foot pedal operated central braking system with up/down base for secure and reliable positioning.
- Designed, manufactured and tested according to international standard, yet offered at a very attractive price.
